

The Greenbrier Companies announced today that, in addition to producing railcars at its Gunderson facility, the Company will reopen its TrentonWorks, Nova Scotia factory. The decision was based on new railcar orders received by Greenbrier for the North American market.

Railcar production at TrentonWorks had been suspended in January, due to a weak overall market for new railcars. Production will resume, with an allocation of 750 railcars from new orders announced by Greenbrier last week. These new orders will create backlog in Nova Scotia through the Fall.

Greenbrier continues to produce railcars at its headquarters facility, Gunderson, in Portland, Oregon. Gunderson currently employs over 800 workers and has a new railcar backlog that also extends into the Fall. This backlog includes an allocation of nearly 100 railcars from recently received orders.

The Company cited improved efficiencies at both locations, and a potentially improved general economic outlook for the second half of calendar year 2002 as reasons for reopening the Trenton facility.

The Greenbrier Companies, headquartered in Lake Oswego, Oregon, is a leading supplier of transportation equipment and services to the railroad industry in North America. Greenbrier builds new railroad freight cars in the U.S., Canada and Mexico, and repairs and refurbishes freight cars and wheels at eleven locations across North America. The company also builds new railroad freight cars and refurbishes freight cars for the European market through its manufacturing operations in Poland and various sub-contractor facilities throughout Europe. At Greenbrier's Portland, Oregon manufacturing facility, it builds ocean-going barges for the maritime industry. Greenbrier owns or manages a fleet of approximately 50,000 railcars.
