To register for or access the webcast, click on the announcement shown on the home page of the Greenbrier website. The webcast will be archived for 90 days.

About Greenbrier

Greenbrier (www.gbrx.com), headquartered in Lake Oswego, Oregon, is a leading international supplier of equipment and services to freight rail transportation markets. Greenbrier designs, builds and markets freight railcars in North America and Europe. We also build and market marine barges in North America. We manufacture freight railcars and rail castings in Brazil through a joint venture in which we hold majority ownership. Through our European manufacturing operations, we are delivering U.S.-designed tank cars to Saudi Arabia. In October 2016, we entered into an agreement with Astra Rail Management GmbH to form a new company, Greenbrier-Astra Rail, which will create an end-to-end, Europe-based freight railcar manufacturing, engineering and repair business. We expect this combination to be completed during 2017. We are a leading provider of wheel services, parts, leasing and other services to the railroad and related transportation industries in North America and a supplier of freight railcar repair, refurbishment and retrofitting services in North America through a joint venture partnership with Watco Companies, LLC. Through other joint ventures, we produce rail castings, tank heads and other railcar components. Greenbrier owns a lease fleet of over 8,000 railcars and performs management services for over 266,000 railcars.
