SUPPLEMENTAL LEASING INFORMATION

(In millions, except owned fleet, unaudited)

Greenbrier's leasing strategy provides an additional "go-to-market" element to Greenbrier's Commercial strategy of direct sales, partnerships with operating leasing companies, and origination of leases for syndication partners as well as providing a platform for further growth at scale. Investing in leasing assets also provides a recurring stream of revenue and tax-advantaged cash flows, however in the short-term it reduces Greenbrier's Manufacturing revenue and margin as a result of deferring revenue recognition.

Financial Metric Definitions

EBITDA is not a financial measure under generally accepted accounting principles (GAAP). This metric is a performance measurement tool used by rail supply companies and Greenbrier. You should not consider this metric in isolation or as a substitute for other financial statement data determined in accordance with GAAP. In addition, because this metric is not a measure of financial performance under GAAP and is susceptible to varying calculations, the measure presented may differ from and may not be comparable to similarly titled measures used by other companies.

We define EBITDA as Net earnings before Interest and foreign exchange, Income tax expense, Depreciation and amortization. We believe the presentation of EBITDA provides useful information as it excludes the impact of financing, foreign exchange, income taxes and the accounting effects of capital spending. These items may vary for different companies for reasons unrelated to the overall operating performance of a company's core business. We believe this assists in comparing our performance across reporting periods.
